School

Seed Grants provide schools with access to funds, knowledge and inspiration to 'Dig in' to farm to school by making small, positive changes in their school food environments over a school term (about 5 months).

\*BC schools were directed to the PHABC Farm to School Seed Grants  
\*\*included Northern regions of provinces

## Schools that serve...

The figure above shows student population demographics of 26 of the 27 2023/24 grant recipient schools. The number on each bar section indicates the number of schools who selected that category.

During the grant term, students:

- Tasted local foods
- Gardened at school
- Visited a farm, fisher, forager, or other producer
- Composted food waste
- Cooked/preserved local food

## Grant Activities

schools' grant activities took place between January and June of 2024.

**85%**

of schools engaged students in hands-on learning.

**85%**

of schools were able to purchase equipment to facilitate school food activities.

**100%**

of schools plan to continue food literacy activities after the end of the grant term.

## Impact Statements

- “ Children are developing cultural knowledge, pride and skills as they interact with foods and medicines.”
- “ We are a project pilot for schools and communities.”
- “ The students have been extremely engaged throughout this project. [I've] never seen such great collaboration, teamwork and pride. The pure joy of discovering new food and tasting a fresh vegetable for the first time.”
- “ [We are] able to secure more healthy foods for students by having a larger fridge space to store it.”

## Obstacles... & Strategies to Overcome

### Program Sustainability

- “ We were able to get a great start on purchasing equipment and supplies to get up and started, but will now need to find funding to maintain the program.”

### Supply Chain Delays

- “ We didn't receive our hydroponic system until the end of the school year due to supply issues and shipping delays. This meant we could not start any growing.”

### Facilitating Connections

- “ Tapping into support and collaboration with other community members, organizations, etc. Once they see us starting these initiatives on our own there is more interest to support us.”

### Program Flexibility

- “ Knowing that we can grow next year! We're all excited about it!”

# Grant Impacts

## Public Health

**93%** of schools increased students' **awareness of nutrition and healthy eating.**

**78%** of schools improved the **school food environment** to better promote healthy foods and make them easy to access.

**67%** of schools increased students' ability to **access healthy food in a dignified way** regardless of their ability to pay.

## Education & Learning

**93%** of schools increased the **number and quality of opportunities for students to learn and demonstrate food skills** (ex. gardening, food preparation, etc.)

**89%** of schools **created a greater sense of vibrancy and excitement** in the school

## Environment

**81%** of schools increased student **knowledge, awareness and interest about environmental and ecological issues**

**89%** of schools increased the amount of students that are **engaged in their local food system** while at school

## Community Economic Development

**59%** of schools increased the **amount of local food they procure and provide** to students.

# Stories

“ In Garden Club I learned that plants are just like us. They need food, water, sunshine, just like us. But also, some plants don't work out. They can die if you don't take care of them. Our parents take care of us. So, we are like parents to the plants. We take care of the plants like our parents do to us” – Megan

“ HERB has added a unique touch to the school's culinary program. It now not only allows students to create food for the community. But also to learn about the time and effort behind growing produce.” – Maia Bailey

# Capacity Building Impacts

In F2CC’s work, we strive to grow capacity in 7 key ways:

- **Knowledge & skills** about key themes related to school food
- Ability to **influence policy** (federal, provincial, or local)
- **Funding** and fundraising capacity
- **Relationships** and connections
- **Validation & inspiration** around the importance of the work

Dig In! Seed Grant recipients shared that their grant experience increased their capacity in these areas:

## Thank You!

We’re so proud of the 2023/24 Dig In! grant recipients and inspired by their achievements! A very big thank you and congratulations to the participating school communities including educators, administrators, parents, volunteers, community partners & STUDENTS for their dedication and hard work in bringing these initiatives to life.

We would also like to extend sincere gratitude to The Schad Foundation for their generous support of the Dig In! Seed Grant Program. We look forward to welcoming a new round of grant recipients for the 2024/25 school year and to watching their programs grow.

## Appendix: A complete list of program impacts as reported by recipients of the 2023/24 Dig In! Seed Grants.

This section provides a fuller set of evaluation data using the indicators in the Farm to School Evaluation Framework for Canada. **The Framework, along with other evaluation tools and resources can be found [here](#).**

Please note:

- All Farm to Cafeteria Canada grant recipients report on impact areas defined in the Evaluation Framework. Some outcomes may be achievable in the short-term, while others are expected to be medium to long-term. Progress reported is expected to vary depending on the scope and term length of the individual grant stream.
- **[Brackets]** after a statement reflect a specific Framework indicator that has been determined to be a “priority” indicator, and therefore assigned a unique identifier.
